Open Collection Diamantatura

Diamantatura è un'azione che fa risaltare la maniglia con luce viva e fa emergere bellezza e lucentezza e alla fine risulterà brillante.Viene eseguita sulla superficie con un percussore meccanico, chiamato diamantatore, che colpendo il metallo, crea una texture che simula la presenza di diamanti incassati.

Diamantatura is a new collection born from the idea of making the handle shine by its own light.
We can accomplish this by hitting the metal with a diamond tip, this allow us to create a texture that simulate the presence of set diamonds.
